Welcome to the *PLOS Complex Systems* Editorial Board

Dear Dr. Samaniego,

Welcome to the [PLOS Complex Systems](#) Editorial Board! We are so excited to partner with you to build this new Open Access journal bringing together impactful research that facilitates understanding of complex systems in all disciplines.

Meet the Editors

- Editor-in-Chief, **Hocine Cherifi**, is a distinguished Full Professor of Computer Science at the University of Burgundy in Dijon, France. His primary research interests lie in the fields of Computer Vision and Complex Networks.

Next Steps

- We are still getting everything set up to prepare to open for submissions but in the meantime please explore equivalent resources available online:
 - Visit a sister journal's [Guidelines for Editors](#) page for resources on your editorial activities and navigating Editorial Manager. (The guidance is the same, even though your journal's page isn't set up yet)
 - ???????? Watch a [New Academic Editor Welcome Webinar](#) recording where we cover your role in the editorial process and resources to support you.

Spread the Word

- [Download](#) your PLOS Complex Systems Editorial Board member badge and add it to your e-signature, social network profiles, website, and more
- Upload your photo and help us highlight your work in this [form](#)

We're so glad to have you on the Board. Please do not hesitate to write to us with any questions.

Best regards,
Dena

Dena Emmerson

Subject: Re: PLOS Complex Systems Editorial Board Formal Invitation

[CAUTION: External
Email.]

Dear,

I appreciate the consideration to be part of the Editorial Board of PLOS Complex Systems as an Academic Editor. Please find my response inline below.

Full Name: Horacio Samaniego

Phone Number: +56 2 2222480

Affiliation Email: horaciosamaniego@uach.cl

Alternate Email (optional): horacio.samaniego@gmail.com

Affiliation: Universidad Austral de Chile, Valdivia Chile

Department: Instituto de Conservacion, Biodiversidad y Territorio

Address: Campus Isla Teja s/n, Valdivia, Los Ríos, Chile

Profile page or personal website:

Provide your brief research summary or biosketch, omitting personal information (200-300 words):

I am broadly interested in understanding urban systems as complex adaptive systems. Originally trained as an ecologist, I am particularly puzzled by the relationship between diversity productivity and sustainability of complex systems. I now use geodata to describe and provide a deeper understanding of urban dynamics and I am particularly interested in bridging the gap between science, policy and practice for the protection of our environment and for ensuring human well-being. To this end, I focus on the role that space plays in the organization of complex adaptive systems such as socio-technological and socio-ecological systems.

Horacio S.

Your research summary greatly helps build your research profile in our database, Editorial Manager. This information helps internal staff editors and our Editorial Board Services team assess your expertise and improve your experience with us. Once you have an account in Editorial Manager, you'll be able to fill out your keywords and classifications as well.

Once we set up your profile, we'll send you a welcome letter with more information and resources. You can update your contact information anytime

in Editorial Manager. As a member of the *PLOS Complex Systems* Editorial Board, you may also receive journal newsletters, invitations to editors meetups, and other communications from the journal team and your colleagues on the board.

Please let me know if you have any questions at all. I'm looking forward to hearing from you soon!

Sincerely,
Cassie Grainger
Editorial Research Associate

On behalf of *PLOS Complex Systems*

***PLOS Complex Systems* Academic Editor Role**

PLOS Complex Systems Academic Editors form an international Editorial Board of active researchers who ensure that innovative, rigorously conducted research submitted to the journal is made available as soon as possible and without restriction.

As experts in the fields of research they serve, our editors voice the needs of their community and are active participants in scholarly communication discussions around open access, open data, open science, and peer-review.

Our Board is...

- Committed to *PLOS Complex Systems*' mission to bring together all researchers working to understand complex systems. *PLOS Complex Systems* will partner with the community to drive Open Science practices forward to enable rapid dissemination of groundbreaking results, cross-fertilization of knowledge, and increased collaboration to address the fundamental questions that affect individuals and global societies.
- Open to innovation in scholarly publishing and the dissemination of scientific communications to meet the community's changing needs
- Engaged with their research communities and, in service to those groups, mindful of the author and reviewer experiences at *PLOS Complex Systems*
- Eager to contribute ideas and lend their expertise to help shape journal goals, policies, and development

Editorial Board Values

We aim to provide fast, fair, and objective scientific assessment of research articles. Our editorial philosophy is built on four key values:

Community Focus

The Editor in Chief(s) and all journal leadership are active researchers and influential members of the community, ensuring that we orient ourselves around the goals and needs of our research community.

Expert Research Assessment

PLOS Complex Systems publishes leading research that has the potential to make a significant impact across disciplines. Research is rigorously evaluated by our Editorial Board of working researchers and peer reviewers with specific expertise in your discipline to ensure the quality of the work we publish is apparent to a broad audience. We believe reproducibility makes research more impactful and is a priority for everything we publish. We encourage authors to share open data, code, and methods as transparently as the nature of their work allows.

Openness and Transparency

We publish all articles at PLOS under a CC BY license, and authors are required to make the data underlying their findings fully available. Anyone may read, reuse, remix, or mine PLOS publications or data for any purpose, with author attribution.

Integrity

We are committed to upholding the highest standards in human and animal research ethics, and in publication ethics. We play an active role in shaping journal policies.

Academic Editor Responsibilities

Our Academic Editors oversee the peer-review process from beginning to end, taking responsibility for conducting an assessment based on the *PLOS Complex Systems* publication criteria, finding and inviting reviewers, evaluating their feedback, making editorial decisions, and communicating decisions to the Section Editor. Academic Editors play an active role in the community, and are highly engaged as representatives of *PLOS Complex Systems*.

To ensure an efficient peer-review process for our authors, our Academic Editors strive to:

- Agree to handle one to two new manuscript assignments per month
- Handle each manuscript assignment from first assessment to final decision
- Respond to manuscript invitations (Accept or Decline) within two days
- Assess whether the manuscript is suitable for peer-review within four days of agreeing to

the invitation

- Secure two or more reviewers on manuscripts that are suitable for review
- Submit a decision within four days of receipt of the complete reviews
- Adhere to editorial best practices

Ambassadorship

Our editors are PLOS ambassadors who are empowered to use their expertise to spread awareness of our [mission](#) and [values](#) in the global research community, forge inclusive relationships, guide and encourage a diverse group of prospective and current contributors, reflect community needs, and increase goodwill.

Code of Conduct

In addition to these role expectations, all editors adhere to PLOS's [Code of Conduct](#) for Editorial Board Members.
